

# Prince Jin

## Full Stack Developer

I am a highly-skilled full-stack developer with over 6 years of experience in web and blockchain development. Looking forward to work with an organization to enhance my capabilities and to learn new things. I seek a dynamic career and want to achieve the excellence in the field of IT and to work to achieve my lifetime goal of becoming a Known Name.

### Skills

- HTML/CSS/SCSS/LESS, JS/TS
- React/Vue/Next/Nuxt/Svelte
- Redux,Vuex,Vanilla,Bulma CSS
- Node/Express/Nest, PHP/Laravel/CI/Yii
- Python/Django, C/C++/C#, Spring Boot
- Solidity/Rust, Web3/Ethers
- Bootstrap/Material/Tailwind/Chakra
- Git/Docker/Jira/Team player
- MySQL/SQL, MongoDB, GraphQL/Firebase, Oracle, MariaDB, DynamoDB
- WebSocket/Socket.io/Web Scrapping

### My Education

**Bachelor of Engineering (BEng)**  
**Sherbrooke University**  
2014.5 ~ 2017.10  
Computer science

### Work Experience

#### FullStack Developer

TheWinkies – London, UK | 2020.07 – 2021.09

- Optimized SQL performance and implemented caching & performance optimization.
- Created a dance studio attendance tracking application.
- Migrated hundreds of gigabytes of data between PostgreSQL, Cassandra, and Elasticsearch, ensuring data sanity and zero loss of data.
- Worked with a wide variety of technologies on projects related to real-time analytics and scalable social gaming architecture.
- Realizing high-capacity, high-speed data processing and high-speed search, maximize and optimization in projects
- Optimized old Dapps performances and improved transaction speed by fixing some old bugs and warnings.

#### Software Engineer

Wizardry Labs – Toronto Canada | 2018.02~2020.04

- Implemented pixel-perfect design using vertical alignments and developed smart, smooth, simple UI from the user's point of view.
- Developed highly scalable and robust API platform components and frameworks, as well as cloud services.
- Drove internal adoption of new frameworks and services, as well as supported and maintained new and existing components and frameworks.
- Developed and maintained a platform for real-time communication based on Node.js and Socket.IO.
- Built an Express.js and Socket.IO web server. Programmed Node.js workers, communicating via RabbitMQ.
- Developed UI components, integrated them into existing code, and supported production apps using the several technologies.
